MESSAGE

I am very happy to note that Department of Library and Information Science, Shri Rawatpura Sarkar University, Raipur is organizing a national level seminar on “Transition of Library from Traditional to Hybrid Mode: Connecting, Communicating and Co-operating” on 10th -11thFebruary 2023.

In the Indian and the state level perspective it has great potential for the development of hybrid transformation of library to connecting and communicating researchers and students in the field of Library and Information Science. New researches and information will enable our academicians, library professional and growing scientist of the region to formulate new innovative ideas for hybrid mode development of library. In such pursuits the organization of national seminar will of great help in finding the path of development of library resources as hybrid mode.

I feel that deliberations and discussions in the seminar in library and information science will definitely reach to a meaningful conclusion and also be very helpful in planning strategies for the research and development in Chhattisgarh state in worldwide.

I wish the seminar a great success.

Shri Harsh Gautam
Pro-Chancellor
Shri Rawatpura Sarkar University,
Raipur, Chhattisgarh

MESSAGE

It gives me immense pleasure to know that Department of Library and Information Science, Shri Rawatpura Sarkar University, Raipur is going to organize seminar on “Transition of Library from Traditional to Hybrid Mode: Connecting, Communicating and Co-operating” 10th and 11th February 2023.

Deliberations in seminar will add the modern knowledge of Library and Information Science and new technologies by which academician and young scientists of the newly formed Chhattisgarh and also for the country will derive multifold benefits.

I congratulate to the department of Library and Information Science, Shri Rawatpura Sarkar University, Raipur for bringing out the souvenir and at the same time wish them success in their entire future endeavor.

I wish the seminar a great success.

Prof. S. K. Singh
Vice-Chancellor
Shri Rawatpura Sarkar University,
Raipur, Chhattisgarh

MESSAGE

I am delighted to know that Department of Library and Information Science, Shri Rawatpura Sarkar University, Raipur, is going to organize a National Seminar on “Transition of Library from Traditional to Hybrid Mode: Connecting , Communicating and Co-operating” on February 10 -11 2023.

Awareness creation on hybrid mode transformation of library in general is very important these days. I hope that discussion in the seminar will provide innovative ideas and new visions for the betterment and enrichment of library resources for connecting people with hybrid mode.

The deliberations by eminent delegates of the seminar will facilitate exchange of knowledge and ideas for students, teachers and library professionals all over the country.

I wish a grand success to the Seminar.

Mr. Manoj Kumar Singh
Registrar

MESSAGE

It is a matter of great pleasure that Department of Library and Information Science, Shri Rawatpura Sarkar University, Raipur, Chhattisgarh is going to organize a National seminar on “Transition of Library from Traditional to Hybrid Mode: Connecting, Communicating and Co-operating” during 10th -11thFebruary 2023.

I am sure that this seminar opens up new avenues and is successful in its attempt to facilitate exchange of knowledge amongst the students, scientist and library professionals of all over the country.

I hope that the seminar will be helpful to all researchers and library professionals to achieve their goals.

Preface

On the Editor Note.....the emerging knowledge's on society for the library and information science with wisdom are critical to the domains of decision making, problem solving as well as dealing with the consequences of our decisions. The advent of the information and communication technology is internet, there is a plenty of information deluge around us. Even those the overwhelmed information seekers are faced with a paradoxical situation of paucity in plenty. Library and Information Professionals role is expanding and they are required to bring delight on the face of information seekers by providing them with pertinent information in affordable and timely manner. Technological developments, though good in functional areas, are not a panacea to all our problems. Fundamental human problems will have to be solved at policy level and supported by pertinent researches and development initiatives. Discourse and communication are the only ways to develop strategic responses to the emerging problems.

NSTLTH-2023 is one such mechanism to take stock of the ICT based challenges and opportunities. It is matter of great satisfaction that there is a tremendous response to NSTLTH-2023. In all 55 Papers were received from all over India. Out of these, 25 papers have been selected for inclusion in pre-conference volume which is presented in the form of book entitled "Transition of Library from Traditional to Hybrid: Connecting, Communicating, and Co-operating". We are glad to know that a few opinion papers supporting our traditional values have also been included in this volume. That is a good effort to create a fair balance between the relic and harbingers of the library and information profession. We shall eagerly look forward to the learning outcome and valuable recommendations of this Seminar. We wish NSTLTH-2023 seminar and the delegate a great success.

The newer technological advancements warrant a newer approach in libraries and information centers. The integration of management principles into the library science, especially the e-pattern of service delivery along with customer relationship and information science. The changing roles of librarians, professional behavior, customer relationship and management ethics and values in the expanding technological era are some of the focus areas on which a number of papers have been contributed.

It was an eye opener for the editors they embarked on the mission of editing this proceeding. The dynamic research potential of many authors was self evident from the diversity of subjects they have covered and analyzed in their papers. It was thrilling journey through the labyrinth of information science, modern technology, the emerging technologies and technique and above all the opportunities and challenge these emerging technologies have thrown open. It was an absolute treat to watch the research acumen of certain papers which has thrown new light on the emerging technologies and their applications.

It is also comforting to see that the entire spectrum of themes outlined in the seminar objective was adequately covered by the contributors. The information age has brought in a spectrum of changes. Amidst these changes, the noble flame of library remains constant. Libraries have been information lighthouses for centuries and will remain so for many more countries to come. The role of information

personnel might change from time to time but the concept of service will remain constant eternally. All the contributions in this volume highlight the noble concept.

Libraries are not just buildings but they are metaphors and the symbols of people quest for knowledge. Through this volume we are happy to add one more dimension to the professional turn of library and information services.
